

Strengths

- **Accumulated Clinical Data Expertise.** Responsible for the design of clinical data pipeline products with a solid knowledge base in clinical trials and drug discovery. Deeply involved in clinical statistical services and design, including TFL, data listings, and medical monitoring. Deep insights, exploration, and application of R and its medical penetration data scenarios.
- **Quick learner, as well.** Capable of rapidly adapting to various forms of rapid prototyping for problem validation, including prototyping through R code.
- **Proficient Design Skills.** Proficient in applying measurement systems to products at different stages, cycles, and forms, enabling flexible tracking methods of product experiences. With experience in product design from 0 to 1, consistently delivering product design and services to a large customer base, contributing to business success.
- **Design ops.** Mature experience in design systems, design innovation, design technology, Design Ops. Diverse project experiences and product forms showcase a profound understanding and analytical ability for systemic products.

Experience

AlphaLife Product Designer @ Product Dept **2021.04 – 2023.11**

Support the entire clinical process, coordinate various scenarios of clinical trials, and contribute to the establishment of an integrated intelligent open platform and implementation pathways. Based on sound design strategies, achieve repeat purchases from multiple product clients and contribute to the intelligent transformation of clinical data.

PingangTech Product Designer @ Strategy Dept **2017.04 – 2021.04**

Responsible for the construction and design of various system businesses across the group, planning user research, and providing a seamless business experience.

Microsoft Design Intern @ CSS OS & USTC **2016.04 – 2017.03**

Responsible for the interaction design of internal systems in charge of permission management.

Education

Donghua Univ. (Direct Admission) Master Product System Design
Sep.2014 – Apr.2017

Shengyang Univ. of Technology Bachelor Industrial Design
Sep.2010 – July,2014

Project

20+ Large-scale Project and Platform Experiences

Compute | Statistical Tool | SaaS | AlphaLife **2021.04 – 2023.11**

Fields

Healthcare, Pharma, Middle Platform, FinTech, Machine Learning, Artificial Intelligence, IoT, Financial Investment, Legal and Risk MGMT, Statistics, Psychology

Skills

Rapid Prototyping, Experience Metrics, IA, Data Visualization, Coding (Python/R), Competitor Analysis, User Research, Product Strategy, Design Ops

Honors and Awards

Apr.2018 2nd PingAn Micro Innovation Competition, Champion Anan digital Insurance Advisor Bot

Journal

Research on the Design of Product Service System for People with Disabilities Based on Gestural Interaction Technology [D]. Donghua University, 2017.

- Head of Design for the Compute statistical tool, A SaaS statistical solution for SAS programmers, Data managers, data scientists and clinical medical professionals. Providing timely, effective and diverse visualized data monitoring and configuration solutions for clinicals. Understanding various regression and prediction models for clinical data insight.

Construct | Database builder | SaaS | AlphaLife 2021.04 – 2023.11

- Head of Design for the Construct. Incubating the design of clinical trial database tools from scratch (0 to 1). Provide database design tools with different encapsulation granularities for professionals such as Data Managers and Database Designers, while enhancing the automation and standards of database construction, furtherly shortening the implementation cycle of clinical trials.

Create | Protocol Composer | SaaS | AlphaLife 2021.04 – 2023.11

- Head of Design for the initial Create clinical proposal writing tool. Provide standardized proposal writing tools for clinical medical professionals.

iLegal | Legal AI | SaaS | PinganTech 2020.01 – 2021.04

- Integrated the needs of legal risk from multiple subsidiary companies with the results of difference analysis, including competitive analysis, product quadrant analysis, and product strategy analysis. Refined user profiles and business models.

Happy Pingan | OA | Web APP PC Tablet | PinganTech 2019.05 – 2020.03

- Ship office automation design and service at cross-platform.
- In-depth understanding of tracking and analyzing data points, provided optimization solutions for the Askbob intelligent answer robot, set optimization goals, and drove iterative upgrades and launches.

Caizhiyun | Reimbursement Sys. | Web | PinganTech 2019.03 – 2019.05

- Provided flexible component design solutions within the constraints of technical development capabilities to enhance the efficiency of the reimbursement process.

Euler | Knowledge Graph & BI | Web | PinganTech 2017.08 – 2018.11

- Conducted user research to design various visual visualization solutions to help users effectively access business insights. Established new styles and methodologies for visual visualization.
